

Your Family Health Organizer

Record Parents' & Kids' Medical Information All in One Place

Now you won't have to rely on memory or solely on your doctor's files when it comes to recording your family's medical history. Become your own medical manager and enjoy the peace of mind that comes with knowing you can access your family's medical information simply and easily.

Record information for 2 parents and up to 3 children

- The helpful tracking sheets let you know which medications your children have been given, as well as any potential reactions
- Includes space to record your child's birth details, as well as an identification profile that enables you to take their fingerprints for your added security and safety
- Record foods as they are introduced to your kid's diet and any allergy details
- Space to record wellness checkups, immunizations, and to take notes before and during doctor's appointments
- Keep track of baby teeth and dental appointments, cavities, eye and ear care
- A "pullout" form for day care or school lets them know about medications your child is taking and how to give it to him/her safely

Need additional pages? More than 3 kids?

JODIE PAPPAS created this organizer after one of her twin girls was born with a rare medical condition that required ongoing treatment and surgery. While attending numerous doctors' and specialists' appointments, all of whom kept different records, she decided she needed a better way to keep track of medical information for her family.

\$19.95 USA
